SKILLS

FRONTEND
React, JavaScript (ES6+), TypeScript, HTML5, CSS3, Bootstrap, Responsive Design

BACKEND
Node.js, Express.js, C#, ASP.NET Core, REST API Development, JWT Authentication

DATABASES
MySQL, SQL Server, PostgreSQL, MongoDB

TOOLS & PLATFORMS
Git & GitHub, Postman, Figma, Agile/Scrum, VS Code, IIS

UI/UX
Wireframing, Prototyping, User Interface Design, Design Systems

EDUCATION

B.Sc Computer Science
National Open University of Nigeria (NOUN)

INTERESTS

Problem Solving UI/UX Design Continuous Learning Open Source Tech Mentoring

PROFILE

Software Engineer with experience building responsive web applications using React, Node.js, and C#. Skilled in developing REST APIs, integrating authentication and payment systems, and translating business requirements into scalable digital solutions. Passionate about writing clean code, solving complex problems, and collaborating with cross-functional teams to deliver user-focused products. Adept at UI/UX design principles and committed to continuous professional growth.

PROFESSIONAL EXPERIENCE

- Software Engineer** 2022 – 2024
Heimdall1791 Technology (Remote, US-based)
 - Built and maintained responsive single-page applications using React, delivering intuitive user interfaces for client-facing platforms
 - Developed RESTful APIs with C# and Node.js to support frontend functionality and third-party integrations
 - Integrated payment processing solutions, improving transaction workflow efficiency
 - Optimized MySQL database queries, reducing data retrieval times and enhancing application performance
 - Designed and implemented admin dashboards with real-time data visualizations for business monitoring
- Software Engineer** 2023 – 2024
Sysbeams, Abeokuta — (Remote)
 - Developed a full-featured e-commerce frontend in React with complete payment flow and cart management
 - Built user authentication and authorization systems using JWT and ASP.NET Core
 - Designed responsive dashboards for user management, order tracking, and analytics
 - Implemented backend microservices with C# and .NET Core, improving system modularity
 - Collaborated with cross-functional teams to gather requirements and deliver features on schedule
- Coding Instructor** 2023 – Present
Code Learners Hub, Abeokuta (Part-time)
 - Teach HTML, CSS, JavaScript, React, and C# to aspiring developers through structured coursework
 - Design and update course materials to reflect current industry practices and modern tooling
 - Mentor students on real-world projects, providing code reviews and technical guidance
- Mathematics Teacher** 2021 – 2024
Muslims Teens Private School (Full-time)
 - Delivered mathematics instruction to secondary school students using modern STEM teaching methods
 - Developed lesson plans and assessment materials tailored to diverse learning needs
- Backend Developer Intern** 2026 (3 months)
Trueminds Innovation (Remote) — 97% Grade
 - Achieved 97% overall grade — the highest among peers in the internship cohort
 - Integrated LLM-powered AI chat features enabling natural language user communication
 - Built end-to-end messaging system for seamless real-time user interaction
 - Developed and optimized API endpoints for AI services and message handling

PROJECTS

- E-Commerce Web Application**
React, Node.js, Express, MySQL, JWT, Stripe API
 - Built a full-featured online store with product catalog, search, and shopping cart functionality
 - Implemented secure user authentication and payment processing via Stripe integration
 - Designed a responsive UI with optimized load times and mobile-first layout
 - Developed RESTful backend APIs for product management, order processing, and user accounts
- Admin Dashboard System**
React, C#, ASP.NET Core, SQL Server, Chart.js, Bootstrap
 - Developed a data-driven admin panel with real-time analytics and interactive charts
 - Designed role-based access control with JWT authentication for secure data management
 - Built backend services with ASP.NET Core Web API for CRUD operations and reporting
 - Optimized database queries and implemented server-side pagination for large datasets
- Fullstack Task Management App**
React, Node.js, MongoDB, Express, JWT, Figma (UI/UX)
 - Created a collaborative task management tool with real-time updates and team workflows
 - Designed wireframes and prototypes in Figma before implementing pixel-perfect UI components
 - Built a RESTful backend with user authentication, task CRUD, and project organization
 - Implemented responsive design ensuring seamless experience across desktop and mobile devices
